

**English –**

Now that you have spent time learning your story and retelling it, it is time to innovate it. We would like you to change the main character and think of a new emergency or main event in the story’s plot. Once you have changed the emergency, you will need to think about how the events that follow will also change.

When you are thinking about a new character you could draw a picture and add some labels to describe him/her. It also might help to role play your ideas for your innovated story or say them out loud to your toys or a member of your family. Remember to check that the sequence of events is ordered correctly and make sense.

**Maths -**

You have been learning lots about multiplication over the last few weeks. We have looked at counting in 2s, 5s and 10s, repeated addition, how we record these as multiplication number sentences and how we can represent them as arrays. Now we would like you to put this into practise! Solve the multiplication problems using what you have learnt. Remember to write the number sentences to go with the word problems and to draw arrays to help you find the answer.

<https://www.twinkl.co.uk/resource/t-n-2387-multiples-of-2-5-and-10-word-problem-challenge-cards>

Here is an example to help you.

On their ninth birthday, Poppy and her twin sister Chloe each had a cake with nine candles. How many candles were needed altogether?  $2 \times 9 =$

**Theme -**

Australia is a huge country! Because it is so big, there are lots of different physical features. These include the outback (desert), rainforests and coral reefs. We would like you to explore Australia, by looking at maps, and find out a little about these different areas. We would then like you to choose one and find out about the animals that live there.

You can record what you have found in any way you would like. You might make a poster, a fact file, a video etc.
