

**English**

In English, we have been learning about poetry. Your task this week is to learn a poem off by heart. You could choose a poem about anything you like. For example, your favourite animal or favourite sport. Once you have learnt it, it would be great if you could perform it to other members in your house. Maybe an adult could film it on their phone and send it to a member of your family to put a smile on their face. We would also love to see it! We look forward to hearing about the poems you have learnt.

Here are some links that might help you find a poem that you like.

Maths

In Maths, we have been looking at the numbers to 50. We have practised counting forward and backwards, starting from zero or any number. We would like you to continue practising this to ensure you are completely confident with it. As and when you are ready, we would also like you to extend this to 100. You may want to use a visual such as <https://www.primarygames.co.uk/pg2/splat/splatsq100.html> to support.

Other possible games and activities are:

- Make your own hundred square with post it notes
- Make and decorate your own number line
- Make a number track around your house/garden and jump forward and backwards along it
- Make up a song/dance for counting
- Test your family by counting how many _ they can do

Other websites to support are:

Theme/Science

We have been learning about our senses; can you go outside and use your senses to detect signs of Spring? What can you see/smell/touch/hear?

We have included a Spring Hunt checklist to give you some ideas about the kind of things you could look out for.

Challenge: what changes can you notice?
